

SODIUM

HYPONATREMIA

CRITICAL LOW: < _____

HYPERNATREMIA

CRITICAL HIGH: > _____

RANGE: _____ - _____

What does it do in the body? What body system/organ(s) favors it? What is the expected function for that body system(s)?

* Note: Understanding function helps understand the problems when it is low/high *

IMPLICATIONS & NURSING MANAGEMENT

What causes it to DECREASE?

What causes it to INCREASE?

Signs & Symptoms when it's LOW? Critically LOW?

Signs & Symptoms when it's HIGH? Critically HIGH?

How do we fix it?

How do we fix it?

ENCOURAGE

DIETARY SOURCES (HIGHEST CONTENT PER SERVING)

AVOID

Soy sauce, canned soups, deli cold cuts, frozen "tv" dinners, fried foods, pickles, bacon,

(arranged from higher content to lower but all rich in sodium.)

HYPOKALEMIA

CRITICAL LOW: < _____

POTASSIUM

RANGE: _____ - _____

HYPERKALEMIA

CRITICAL HIGH: > _____

What does it do in the body? What body system/organ(s) favors it? What is the expected function for that body system(s)?

* Note: Understanding function helps understand the problems when it is low/high *

IMPLICATIONS & NURSING MANAGEMENT

What causes it to DECREASE?

What causes it to INCREASE?

Signs & Symptoms when it's LOW? Critically LOW?

Signs & Symptoms when it's HIGH? Critically HIGH?

How do we fix it?

How do we fix it?

ENCOURAGE

DIETARY SOURCES (HIGHEST CONTENT PER SERVING)

AVOID

Baked potato, spinach, avocado, white beans, sweet potato, tomato sauce, banana, orange juice, lentils

(arranged from higher content to lower but all rich in potassium.)

HYPOMAGNESEMIA

CRITICAL LOW: < _____

MAGNESIUM

RANGE: _____ - _____

HYPERMAGNESEMIA

CRITICAL HIGH: > _____

What does it do in the body? What body system/organ(s) favors it? What is the expected function for that body system(s)?

* Note: Understanding function helps understand the problems when it is low/high *

IMPLICATIONS & NURSING MANAGEMENT

What causes it to DECREASE?

What causes it to INCREASE?

Signs & Symptoms when it's LOW? Critically LOW?

Signs & Symptoms when it's HIGH? Critically HIGH?

How do we fix it?

How do we fix it?

ENCOURAGE

DIETARY SOURCES (HIGHEST CONTENT PER SERVING)

AVOID

Pumpkin seeds, almonds cooked spinach, black beans, peanut butter, whole-grain cereal, brown rice, oatmeal, avocado

(arranged from higher content to lower but all rich in magnesium.)

HYPOCALCEMIA

CRITICAL LOW: < _____

CALCIUM

RANGE: _____ - _____

HYPERCALCEMIA

CRITICAL HIGH: > _____

What does it do in the body? What body system/organ(s) favors it? What is the expected function for that body system(s)?

* Note: Understanding function helps understand the problems when it is low/high *

IMPLICATIONS & NURSING MANAGEMENT

What causes it to DECREASE?

What causes it to INCREASE?

Signs & Symptoms when it's LOW? Critically LOW?

Signs & Symptoms when it's HIGH? Critically HIGH?

How do we fix it?

How do we fix it?

ENCOURAGE

DIETARY SOURCES (HIGHEST CONTENT PER SERVING)

AVOID

Yogurt, milk, sardines w/bones, cheese, cottage cheese, cooked kale, almonds, broccoli, white beans, ice cream.

(arranged from higher content to lower but all rich in calcium.)

HYPOPHOSPHATEMIA

CRITICAL LOW: < _____

PHOSPHOROUS

RANGE: _____ - _____

HYPERPHOSPHATEMIA

CRITICAL HIGH: > _____

What does it do in the body? What body system/organ(s) favors it? What is the expected function for that body system(s)?

* Note: Understanding function helps understand the problems when it is low/high *

IMPLICATIONS & NURSING MANAGEMENT
